Strong:

Javascript (ES5/ES6), jQuery, HTML5/CSS3,
Bootstrap, Materialize CSS, API, AJAX, Axios,
JSON, React.js, Redux Form, PHP, Regex

Experienced:

MySQL, Amazon Web Services EC2,
Node.js, XAMPP, Apache2, Ubuntu

Tools/Methodology:

Git, Github, SASS, Agile Methodology, MeisterTask, Postman, Figma, DB Designer, Chrome Dev Tools, VS Code, React Dev Tools, JSONLint, Wordpress

Applications Developed

Career Assistant - A Job Tracking CMS developed in a team environment

- Implemented **Redux Forms** to allow users to input data
- Used **React.js** as the main frame work
- Integrated **Materialize CSS** to create a modern aesthetic

CozyCorners - A Location Finding CMS

- Utilized **jQuery AJAX** calls to interface with Google Maps, and Yelp
- Used a proxy **PHP** server to access Yelp's **API**
- Implemented **local storage** saving to allow users to save information for later use

Witcher - A Memory Match Card Game

- Created through the **OOP paradigm** using **Javascript** classes
- Used **jQuery** to dynamically create cards appended to the DOM
- Applied custom **CSS** to create a mobile responsive game

Work Experience

Anthem & Song Pictures Marketing Assistant

Summer 2017 & 2018, Los Angeles, CA

- Used and maintained a proprietary database to document and research the current trends in action and Sci-Fi films and TV series.
- Worked in a team to find an appropriate director of photography and martial arts
- Worked on several ad-hoc projects focused on taking new sets of data and verifying whether the information matched the proprietary database
