Technical Skills

Strong

Javascript (ES5/ES6), jQuery, AJAX, HTML5/CSS3, Bootstrap, OOP, API, Axios, Materialize CSS, JSON, Node.js, React.js, Regex, Redux Form

Experienced

PHP, MySQL, Amazon Web Services EC2, XAMPP, Apache2, Ubuntu

Tools/Methodology

Git, Github, Agile Methodology, MeisterTask, Postman, Figma, DB Designer, Chrome Dev Tools, VS Code, React Dev Tools, JSONLint, SASS, Wordpress

Applications Developed

Career Assistant | Live | Github
- A Job Tracking **CMS** that is designed to allow users to keep track of their job applications
- Worked in a group of three to implement **Redux Forms**, this allowed us to make the user have the freedom to input more information
- **React.js was** used as a main frame work; meanwhile, **Materialize CSS** was integrated to create a modern aesthetic

StudyFinder | Live | Github
- Application designed to search for local study locations
- Utilized **jQuery AJAX** calls to Google Maps, and Yelp
- Used a proxy **PHP** server to access Yelp's **API**
- Implemented local storage on tasks and locations in order to allow users to save info for later use

Student Grade Table | Live | Github
- A memory match card game based upon Gwent, the Witcher card game
- Uses **Javascript** and **jQuery** to dynamically create cards which are then appended to the DOM
- Uses custom **CSS** to create a responsive and fun game

Experiences

Marketing Assistant   Los Angeles, California   2017

Anthem & Song Pictures
- Used and maintained a proprietary database to document and research the current trends in action and Sci-Fi films and TV series.
- Worked in a team to find an appropriate director of photography and martial arts
- Worked on several ad-hoc projects focused on taking new sets of data and verifying whether the information matched the proprietary database

Education

University of California, Santa Barbara

Bachelor of Arts in English

LearningFuze|Accelerated Web Development Program

Over 60 hours of coding per week

Hobbies and Interests

When I'm not coding I enjoy reading, writing, playing tennis or badminton and videogames, currently I am enjoying the Witcher 3 Wild Hunt. I am also fluent in Mandarin Chinese with some skills in Spanish.
