Applications Developed

Career Assistant - A Job Tracking CMS developed in a team environment Live | Github
- Implemented **Redux Forms** to allow users to input data
- Used **React.js** as the main frame work
- Integrated **Materialize CSS** to create a modern aesthetic

CozyCorners - A Location Finding CMS | Live | Github
- Utilized **jQuery AJAX** calls to interface with Google Maps, and Yelp
- Used a proxy **PHP** server to access Yelp's **API**
- Implemented **local storage** saving to allow users to save information for later use

Witcher - A Memory Match Card Game | Live | Github
- Used **Javascript** and **jQuery** to dynamically create cards appended to the DOM
- Applied custom **CSS** to create a mobile responsive game

Work Experience

Marketing Assistant
Anthem & Song Pictures, Los Angeles, California
- Used and maintained a proprietary database to document and research the current trends in action and Sci-Fi films and TV series.
- Worked in a team to find an appropriate director of photography and martial arts
- Worked on several ad-hoc projects focused on taking new sets of data and verifying whether the information matched the proprietary database

Education

University of California, Santa Barbara, Bachelor of Arts in English
LearningFuze| Accelerated Web Development Program with 60+ hrs of coding per week
